

MEASURING YOUR DOG FOR A TRAINING HALTER - FIT GUIDE

You could guess the size, but it would be like buying an expensive outfit without even trying it on, so here is info on how to get the best fit for your dog.

The Nose Band and Cords on the Training Halter allow for a large adjustment, so we base the sizing on a dog's neck measurement

Use a soft tape measure place it around your dog's neck up close behind the ears, this is where the neck strap should fit and take a snug to tight neck measurement.

Important: If your dog fits between 2 sizes, generally select the smaller size, *UNLESS you are fitting a growing dog in which case you might go for the larger size to allow for future growth.*

Check your dog's neck measurement against the chart below, to select the appropriate size.

Training Halter Size	Min (cm)	Max (cm)
Mini (Neck Adjustment)	20 (cm)	35 (cm)
Small (Neck Adjustment)	27 (cm)	37 (cm)
Medium (Neck Adjustment)	35 (cm)	52 (cm)
Large (Neck Adjustment)	43 (cm)	68 (cm)

FITTING IS SIMPLE

1. Adjust the Neck Strap to fit (a tight, snug fit high on the neck is best). Take the Halter off again.
2. Slide the Nose Strap over the dog's muzzle (reward the dog with a little treat to ease any concerns).
3. Buckle the Neck Strap.
4. Pull down on the Lead Ring (this adjusts the Training Halter to fit the dog's face).
5. Slide the cord lock to about 1cm below the D Ring under the dog's throat
6. Attach a lead, and your dog is ready to go.

Reward your dog, when introducing it to the Halter and throughout the first week, particularly when you first fit the Halter and as your dog works well on lead.
