

# DOG BOOTS SIZE CHART

## All dogs feet vary in size, just like people!

Please use the below instructions to properly measure your dogs feet before you purchase!

### How to Measure

Have your dog stand on a piece of paper. | Mark the front, back and each side of the foot.

Measure the length and width of the marks on your paper. | Match as close as possible to the listed measurements.

Note: All four paws should be measured and the largest measurement kept. The width of the paw should be slightly smaller than the width of the boot.

### Why do dogs need socks?

- Prevents infections on the feet
- Protects feet from salt/frostbite in the snow
- Keeps feet clean while playing outdoors
- Keeps feet safe from hot/course ground, glass, sand, etc.
