

Aviator Bird Harnesses

Created by The Parrot University
Distributed by www.prestigepetproducts.com.au

The AVIATOR Harness uses advanced technology that is not used in any other style of pet bird harness.

The **AVIATOR Harness** is the only truly safe bird restraint system. Hundreds of thousands sold around the world attest to the safety and quality of The Aviator.

The only **ESCAPE PROOF** pet bird harness. Your bird can easily remove the leash and sometimes the harness from every other brand of harness.

Easily fits the largest pet birds and budgies under 75g.

One piece design - No pieces to assemble.

Advanced engineering has eliminated dangerous buckles and clips that distract and injure birds.

Easiest to install - Only one slide

Installs in less than ½ the time it takes to install all other harness.

Elastic Leash For Safety

Elastic leash safely absorbs impact shock and keeps birds from being injured if they unexpectedly fly to the end of the leash.

Revolutionary design

Reduces the total harness weight - especially on small birds. Some harnesses can weigh as much as the bird!

Petite and Extra Small harnesses weight only 10 grams. Larger sizes weight only 25 grams.

Specially engineered collar

Hugs the neck keeping the strap from sliding toward the wings and annoying your pet. The AVIATOR's special collar design is the only harness that allows birds to safely wear the harness with food in their crop.

Self-adjusting leash

Changes orientation as bird moves around handler. Automatically adjusts from the chest to the back as the bird climbs and flies.

Special design knitted nylon strap

Very flexible to conform to your friends' body.

Special Ultrasonic Cutting and Welding of material

Eliminates distractive stitching and shape edges that can cut your friends very thin skin.

Connects

To retractable cord leash and FLIGHT LINE (sold separately) for greater flying distance.
